Professional Summary

Senior Data Scientist with 8+ years of experience applying analytics, statistical modeling and machine learning to solve business challenges across fintech and financial services. Currently leading personalization and recommendation initiatives serving more than 2 million users, with expertise spanning recommendation systems, credit risk modeling, churn prediction and product analytics. Proven ability to partner with Product, Marketing and Engineering teams to build scalable data products, drive experimentation and provide technical leadership from ideation to production.

Professional Experience

ITTI | Senior Data Scientist | Jun 2024 – Present

- Led the development and deployment of personalization and recommendation systems serving more than 2 million users through the bank's mobile application.
- Owned the end-to-end lifecycle of personalization initiatives, from problem definition and experimentation to deployment, monitoring and continuous improvement.
- Designed and implemented Next Best Action and recommendation models to optimize customer engagement, product adoption and portfolio growth.
- Built and maintained production-grade machine learning pipelines using AWS SageMaker, MLflow, Athena, Lambda and API Gateway.
- Designed feedback collection frameworks to capture user interactions and model outcomes, enabling continuous learning and performance evaluation.
- Provided technical leadership across cross-functional initiatives, partnering with Product, Marketing and Engineering teams.

Grandata | Senior Data Scientist | Apr 2023 – Jun 2024

- Developed machine learning models for credit risk assessment in the Mexican financial market, supporting lending decisions and portfolio growth strategies.
- Built large-scale data processing and feature engineering pipelines using Python and Apache Spark.
- Designed and evaluated predictive models using robust validation frameworks and business-driven metrics.
- Collaborated with cross-functional teams to translate business requirements into scalable data science solutions.

CloudWalk | Senior BI & Data Analyst | Feb 2022 – Apr 2023

- Developed and deployed churn prediction models to identify users at risk of attrition and support targeted retention strategies.

- Led the design and monitoring of growth and engagement metrics supporting business decision-making.
- Designed customer segmentation frameworks to improve campaign effectiveness and audience targeting.
- Partnered with Product and Marketing teams to evaluate campaign performance and identify growth opportunities.

Mercado Libre | Functional Senior Analyst – Engagement & Growth | Mar 2021 – Feb 2022

- Designed and analyzed experiments to evaluate customer engagement, credit card and collections campaigns.
- Leveraged SQL-based analysis to measure campaign performance, customer behavior and business outcomes.
- Developed dashboards and monitoring processes to track campaign effectiveness and support decision-making.
- Partnered with cross-functional teams to translate business questions into analytical frameworks and actionable insights.

Prudential Seguros | Actuarial Senior Analyst – Pricing | Mar 2020 – Mar 2021

- Developed pricing models and actuarial analyses to support product profitability and strategic pricing decisions.

Banco Hipotecario | Actuarial Analyst – Audit | Aug 2019 – Mar 2020

- Audited IFRS 9 and Economic Capital models, assessing methodological consistency and regulatory compliance.

MetLife | Actuarial Analyst – GAM | Jan 2018 – Aug 2019

- Validated cash flow models used for regulatory valuation and financial reporting under EV, US GAAP and IFRS 17 frameworks.

Education

Universidad de San Andrés — Master's in Data Science (2026)
 Thesis: Detecting Self-Excitation in Crime Event Series Using Hawkes Processes
 Thesis graded with Highest Distinction

Universidad de Buenos Aires — Actuary

Technical Skills

Machine Learning: Recommendation Systems, Personalization, Ranking Models, Churn Prediction, Credit Risk Modeling

Product & Analytics: Product Analytics, Experimentation, A/B Testing, Customer Segmentation, Statistical Modeling

Cloud & MLOps: AWS SageMaker, MLflow, Athena, Lambda, API Gateway, Bedrock

Programming: Python, SQL, Spark, R

Languages

Spanish (Native)
English (Advanced Professional Proficiency)
